## Who we are

### - Foundation

Liguria Consulting Solutions S.r.l. is a consulting and software development company, founded in Genoa in 2009 by a group of young computer science researchers and graduates.

### - Team

LCS team has expanded over the years, but has never lost the spirit of the origins: it is composed of professionals who offer solid theoretical knowledge acquired in the academic field and consolidated technical skills gained with many years of experience in the field.

# Liguria Consulting Solutions S.r.l.

## Who we are

### - **Certifications, associations e collaborations**

The company is certified ISO9001 in the field "Design and development and consulting services in ICT field".

LCS is a Technical Provider in Gartner in the fields of Track&Trace, Microservices and ERP, and is part of some important trade italian associations:

LCS also collaborates actively with the Department of Computer Science of the University of Milan and other university groups.

## Goals

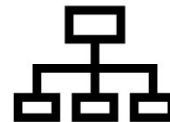

LCS supports its customers to:

- improve productivity
- simplify process management

through applications able to plan, optimize and monitor logistical and organizational flow.

We use new ICT technologies to design and implement systems for the management and monitoring of the Supply Chain, creating Tracking & Tracing (T&T) solutions for real-time monitoring, allowing an advanced investigation with consequent possibility of optimization of the flow.

# Liguria Consulting Solutions S.r.l.

## Operating mode

- We can work with different operating modes, depending on the specific customer needs:
  - approach a problem starting from consulting and analysis, design the solution together with the customer and build it;
  - design applications and make them "turnkey";
  - develop and integrate applications or single modules on existing specifications.
- We can create custom applications or propose and integrate our own solution, the  SMART HELPER
- We guarantee effective support and continuous evolution of our applications.

SMART  HELPER™

INCIDENTS

MONITORING

CONTROLLING

PLANNING

**SMART HELPER** is a suite of cloud services that allows to supervise generic processes. The individual modules can be used separately, to face a specific need, or integrated together, to control the entire process.

The **Controlling** module can be interfaced with IoT devices or with a neural network that detects objects in real-time video coming from cameras.

The **Planning** module includes the optimization engine, based on artificial intelligence.

# Liguria Consulting Solutions S.r.l.

## Why choose us

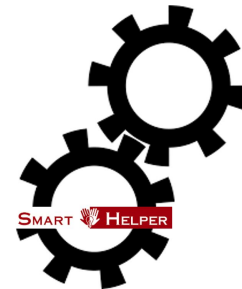

- **Flexibility:** our structure is streamlined and agile. This makes us fast and responsive, both from the commercial point of view and during the realization of projects.
- **Continuous innovation:** technology is always evolving and LCS, true to its university origins, invests to stay competitive and offer its customers solutions always up to date.
- **Experience:** thanks to our long experience as a system integrator we are able to quickly enter the world of our customers, speaking their language and recognizing the critical points of the their processes.

# Liguria Consulting Solutions S.r.l.

## Why choose us

- **Customer focus:** each project is unique for us. We do not just take care of the development, but above all the integration phase and fine-tuning: we are not satisfied until the customer is satisfied!
- **Support and evolution:** usually our support to projects in production is not limited to corrective maintenance. We offer evolutionary maintenance services, to meet the changed needs of users or to integrate new features or technologies.

Tech Provider
